

PREFERRED COLLISION REPAIRER BULLETIN

CATEGORY: General
DATE: 27 July 2013
REFERENCE:
SUBJECT: DataDot Replacement Kits

DataDot replacement kits have been redesigned and no longer have a limited shelf life enabling the convenience of stock on hand at the Collision Repair Shop. DataDots now come in packs of 5 eliminating the need for those last minute orders.

Remember, all Subaru vehicles come standard with DataDots and not only are they recognised as a key deterrent against vehicle theft, they are also part of the Subaru DNA.

It is important for vehicle owners and insurance companies that vehicles are returned to the original manufacturers specifications after repairs.

A repair kit is now available for you to order as a spare part, detail as follows,

- 2,000 DataDots in special adhesive U.V additive and Data Trace security in "Mini" pod.
- Application Brush
- Cleaning Pads
- Registration Form and instructions on how to register the replacement DataDots on- line against the vehicles VIN number.
- Application Gun (starter Pack only)

Please contact your local Wholesale Parts Dealer for immediate supply.

Many Thanks

Andrew Minns
