Structural Technician

Estimator

Non Structural Technician

The Nissan Rogue 2021 Collision Repair course is a 45-minute course that provides an overview of vehicle design and construction materials. The course will identify and explain service parts and repairs that are common in the collision industry. Unique aspects of service parts and procedures will be reviewed where applicable. Considerations for sectioning, attachment methods, and videos on specific part removal and installation will be covered in this course.

After completing this course, you will be able to:

- Identify specific service parts and repair procedures
- Identify vehicle construction materials
- Understand sectioning procedures and joining techniques
